SUMMARY

Results-driven Frontend Developer with 9+ years of experience architecting and delivering scalable, high-performance web and mobile applications. Expertise in React.js, JavaScript, Angular, and modern frontend architecture with a strong focus on performance optimization, memory management, security best practices, and responsive UI design. Experienced in leading Agile teams, implementing scalable component-based architectures, and integrating RESTful APIs.

SKILLS

SKILLS Frontend	React.js, React Native, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Typescript, MongoDB, Bootstrap, Angular, Vue.js, Ionic Framework.
State Management	Redux, Context API, Redux Toolkit.
Backend & Integration	Node.js, Express.js, RESTful APIs.
Architecture	Component-Based Architecture, Micro frontend Concepts, Responsive UI/UX, Cross-Browser Compatibility, Performance Optimization.
Performance	Code Splitting, Lazy Loading, Memory Optimization, Production Debugging.
Security	Input Validation, Secure API Consumption, Authentication & Authorization Flows.
Tools & DevOps	Git, CI/CD Concepts, Agile/Scrum

EXPERIENCE

Senior Software Developer

Facile Consulting Pvt Ltd | Bangalore | 2016 – Present

- Architected and led development of scalable React.js applications using modular, reusable component architecture.
- Implemented optimized state management solutions (Redux, Context API) to improve workflow efficiency and maintainability.
- Improved application performance by identifying bottlenecks, optimizing rendering cycles, and reducing memory usage.
- Spearheaded code reviews across 50,000+ lines of code, resolving 150+ critical bugs and reducing production defects by 30%.
- Designed responsive UI systems ensuring cross-device and cross-browser compatibility.
- Integrated REST APIs and collaborated with backend teams for seamless data exchange.
- Led Agile ceremonies (sprint planning, stand-ups, demos, retrospectives), improving sprint completion rate by 20%.
- Mentored a team of 5 frontend developers, enforcing coding standards and architectural best practices.
- Reduced developer onboarding/ramp-up time by 30% through structured training and documentation.
- Contributed to secure application design by implementing authentication flows and data validation mechanisms.

Software Developer

SoftServe Global | Feb 2015 – Mar 2016

- Developed scalable frontend modules using JavaScript and Angular to meet internal product and client requirements.
- Collaborated with 5 cross-functional teams to deliver projects on time, improving delivery speed by 15%.
- Assisted in database integration and backend API consumption.

KEY PROJECTS

Start Hub Application | React.js Node.js, Tailwind CSS

Architected reusable React components and optimized rendering performance. Ensured responsive UI, managed sprint planning, and coordinated secure API integration with backend teams.

CYA – Cover Your Ass | React Native, Node.js, JavaScript, HTML

Developed a mobile-first asset management application enabling real-time barcode-based equipment tracking with geolocation support, helping organizations maintain accurate inventory records.

Hello spoke | React.js, Node.js, Express.js, Tailwind CSS

Built a VoIP-based communication platform with call reports, recordings, internal presence, texting, and centralized contact management, replacing traditional phone systems with a mobile-first solution.

Mentorz | React Native, Tailwind CSS

Developed a mentorship platform connecting mentees with expert mentors. Designed features for real-time collaboration, knowledge sharing, and session management.

Mi-life | Ionic Framework, AngularJS, JavaScript, HTML

Built a healthcare communication app for elderly users, enabling medical record sharing with doctors, appointment scheduling, and prescription updates with MMS/social media integration.

School Alert System | jQuery, JavaScript, HTML

Created a notification system for schools to send targeted alerts for absences, fee reminders, and announcements via SMS and email.

EDUCATION

BE – Electronics & Communication Engineering

Visvesvaraya Technological University (VTU), Belagavi | 2010 – 2014 | 70%

Angadi Institute of Technology and Management

ACHIEVEMENTS

- Led end-to-end product development from scratch, directly contributing to company revenue growth and business expansion.
- Reduced developer onboarding time by 30% through structured mentoring programs and technical documentation.
- Improved system stability by reducing production defects by 30% through rigorous code review processes.
- Increased sprint completion rate by 20% through effective Agile facilitation and cross-team alignment.
- Implemented Agile Scrum methodologies, including sprint planning, daily stand-ups, and retrospectives to enhance team productivity.
